

Education

Champlain College — Bachelor of Science in Game Design, Minor in Computer Science *Aug. 2024 – May. 2026*

Drexel University — Major in Game Design & Production, Minor in Computer Science *Sept. 2021 – Aug. 2024*

Skills

- **Tools:** Unreal Engine UE4/UE5 | Blueprints | Unity | Visual Studio Code | C# | C++ | Python | Autodesk Maya | Adobe Photoshop
 - **Processes:** Agile | Modular Design | Iterative Design | AI Perception/Response Design | Behavior Trees | Gameplay and Systems Prototyping | QA Testing and Hosting | Asset Integration Pipelines
-

Notable Project

Lead Designer / Technical Designer — With It We Leave *Aug. 2025 – Present*

- Designed and implemented the core gameplay systems including enemy AI behaviors, player mechanics, and Sanity system supporting psychological horror pacing
 - Iterated systems through structured playtests, tuning balance, pacing, and readability based on feedback.
 - Built modular interaction and trigger frameworks to support level scripting, progression, and narrative events; authored documentation to ensure reliable onboarding and handoff.
 - Pitched vertical slice to review committee to determine viability of project to continue beyond prototype phase
 - Shipped the game onto Steam with overwhelmingly positive reviews
-

Experience

Game Guru, Server, Barista, Host — The Board and Brew *Sept. 2022 – Aug. 2024*

- Provided attentive and courteous customer service by answering questions, delivering food and beverages, and offering personalized board game recommendations.
- Worked collaboratively with the team to maintain a welcoming atmosphere and ensure customer satisfaction.
- Developed and managed the training schedule for incoming Game Gurus and trained new servers to meet company standards within a four-day period.
- Managed the board game library, assisting customers with recommendations, rule clarifications, locating games, and coordinated private/promotional events.
- Prepared a variety of caffeinated and alcoholic beverages for patrons.

Gameplay Designer (Remote) — Quadratron Games *Sept. 2022 – Mar. 2023*

- Designed and implemented gameplay mechanics, rules, hero abilities, and card effects for a prototype strategy board game.
- Collaborated with project leadership on iterative rule updates, balance adjustments, and expansion planning.
- Conducted repeated playtests, translated feedback into actionable design changes.
